IFSC Result Service Handbook

Fabrizio Minnino
IFSC Officials Commission Director

WARNING

This handbook is a technical handbook to manage IFSC
Resultservice, not a Rules handbook.

All the examples used in this handbook in any kind of competition (method of preparing starting lists, quota for each round, tied competitors, superfinal etc.) may be based on unupdated rules.

GENERAL INFORMATION

Why IFSC Official Result Service?

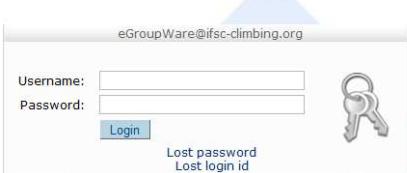

Sport Climbing needs visibility: to use an Internet based Result Service gives to all the competition an immediate visibility all over the world in real time.

The use of this Result service let also all the Federations have all the ranking updated at the end of the competition.

How to Log in?

Type in the Internet bar: <http://www.ifsc-climbing.org/egroupware/login.php>

Every Jury President has a personal USERNAME / PASSWORD to enter in IFSC Result Service.

If you have forgotten your password or your login click LOST PASSWORD or LOST LOGIN ID and follow the information

When you are correctly logged in your name is written in the upper right corner, close to date and time.

Who is allowed to manage Result Service?

Only Jury Presidents (better, JP usernames) who have been appointed for that competition can manage Result Service.

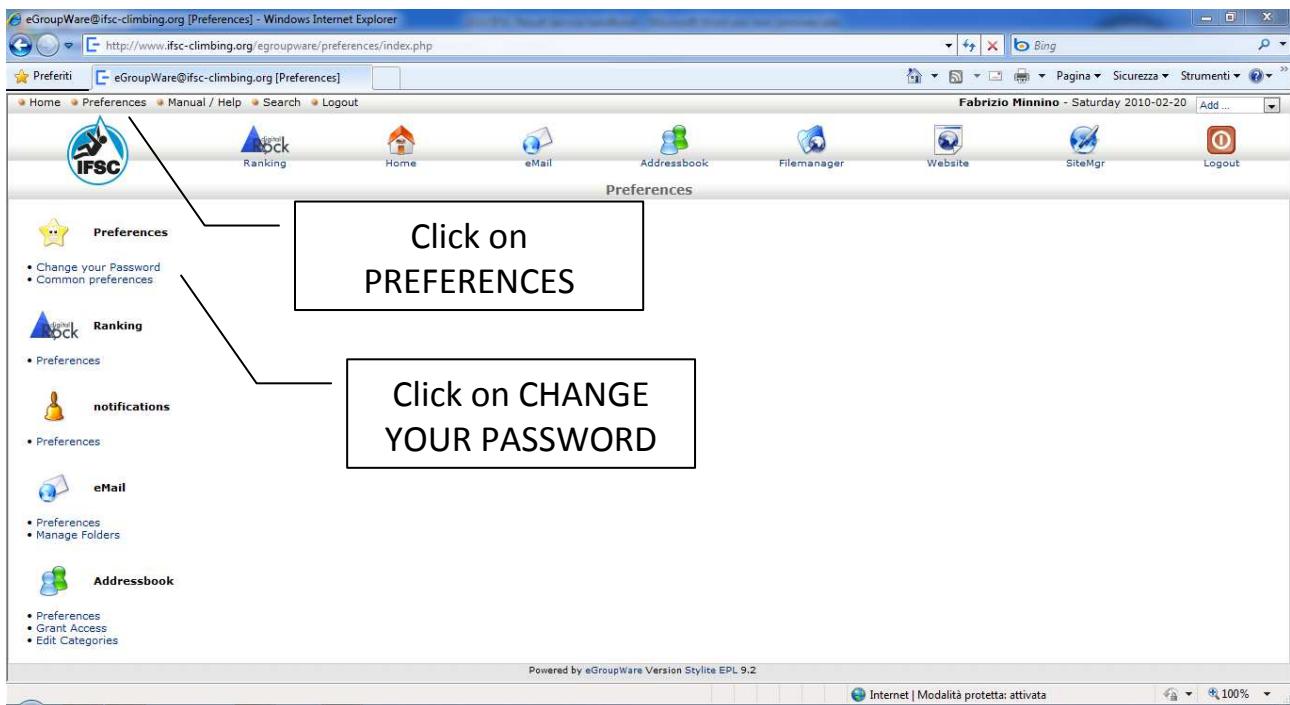

The link between appointed Jury President and competition is made by IFSC Web Manager.

When you are appointed for a competition please check, a couple of days before the competition, that you are allowed to manage that competition: you can easily understand it because when you enter in that competition you can see in the main menu these ADD A NEW HEAT BUTTON.

If you don't see these button you are not allowed to manage this competition!

If you realize you are not allowed to manage Result service in a competition where you have been appointed please send immediately an email to office@ifsc-climbing.org explaining the problem (this can happen especially if the Jury President has been changed at the last minute).

How to change current password?

The screenshot shows a software interface with a top menu bar containing "Home", "Preferences", "Manual / Help", "Search", "Logout", and the date "Fabrizio Minnino - Saturday 2010-02-20". Below the menu are several icons: IFSC logo, Ranking, Home, eMail, Addressbook, FileManager, Website, SiteMgr, and Logout. A central section titled "Change your Password" contains fields for "Enter your old password", "Enter your new password", and "Re-Enter your password". Buttons for "Change" and "Cancel" are at the bottom. A note below the fields states: "Note: This feature does *not* change your email password. This will need to be done manually." At the bottom right of the interface is the text "Powered by eGroupWare Version Styliste EPL 9.2".

How to print?

This program hasn't a specific printing function: you can print in any moment using the printing button of the browser, normally identified by this icon .

When you use this icon the program prints all the additional information (name of the judges, opening and closing of the isolation, date and time etc.).

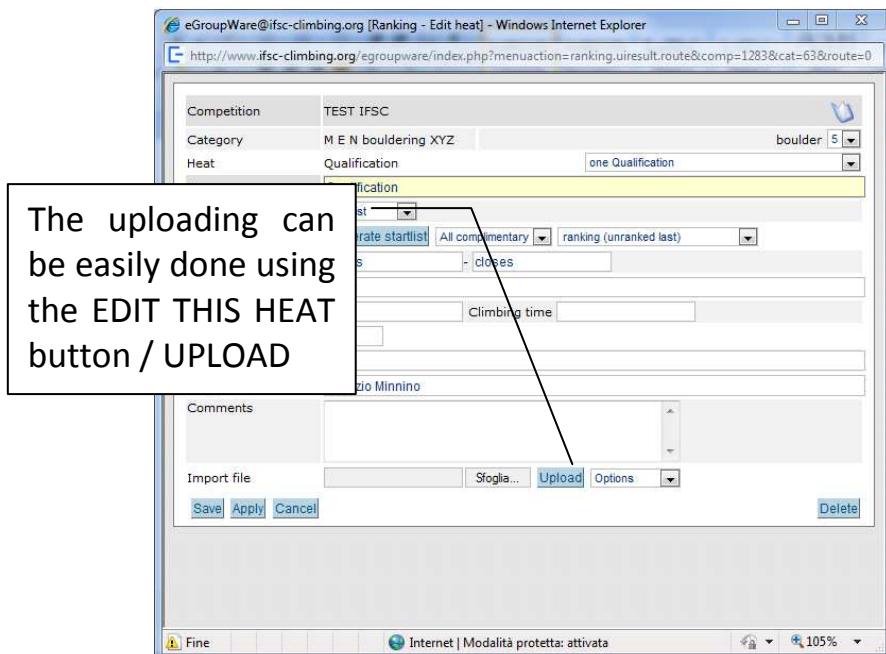

How to use IFSC Result service also with problems in the Internet connection?

When you create the first heat you can see also this DOWNLOAD BUTTON.

Using this button you can, in any moment of the competition, download what you are seeing in the window in that moment (starting list / result list). Take care: unpublished data cannot be downloaded. All the data will be downloaded as Excel file.

The screenshot shows a Microsoft Excel spreadsheet titled "M_E_N_lead_XYZ_- Semifinal - Microsoft Excel uso non commerciale.". The spreadsheet contains a table with columns: comp, cat, heat, athlete, place, category, route, startorder, lastname, firstname, nation, federation, birthyear, ranking, ranking-points, startnumber, result. The data consists of numerous rows of competition results, such as "1 comp cat heat athlete place category route startorder lastname firstname nation federation birthyear ranking ranking-points startnumber result" and "2 1283 62 2 9028 1 M E N lead XYZ Semifinal 18 TEST Athlete 43 XYZ TEST Federation 1973 13 Top". The Excel ribbon at the top includes tabs for Home, Inserisci, Layout di pagina, Formule, Dati, Revisione, and Visualizza. The formula bar shows "E5" and "1". The status bar at the bottom right shows "90%".

Using this Excel file you can manage locally your Result service, but without modifying the structure of the Excel sheet if at the end you want to upload the resultlist into the Result service.

When you upload your results file the system checks if everything is correct and, if the check is ok, let you import the file. If there is something wrong you will be informed about it.

The DOWNLOAD BUTTON can also be used by organizers to manage a further Result Service.

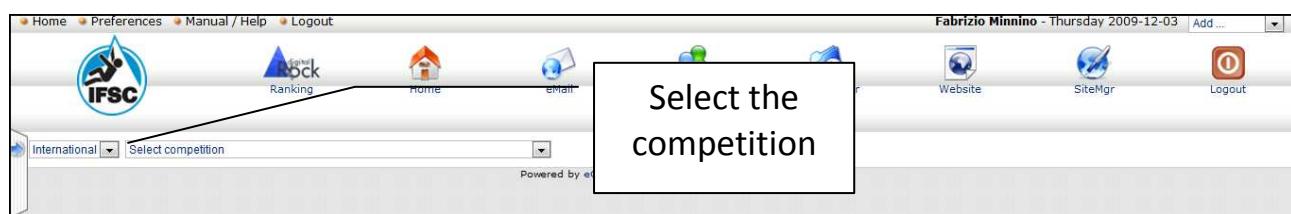

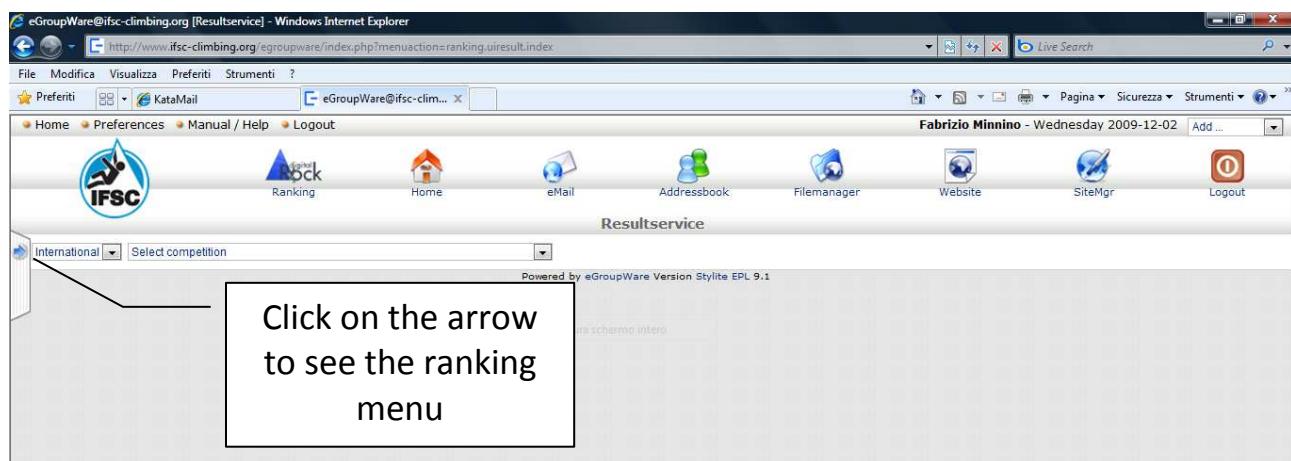

How to log out?

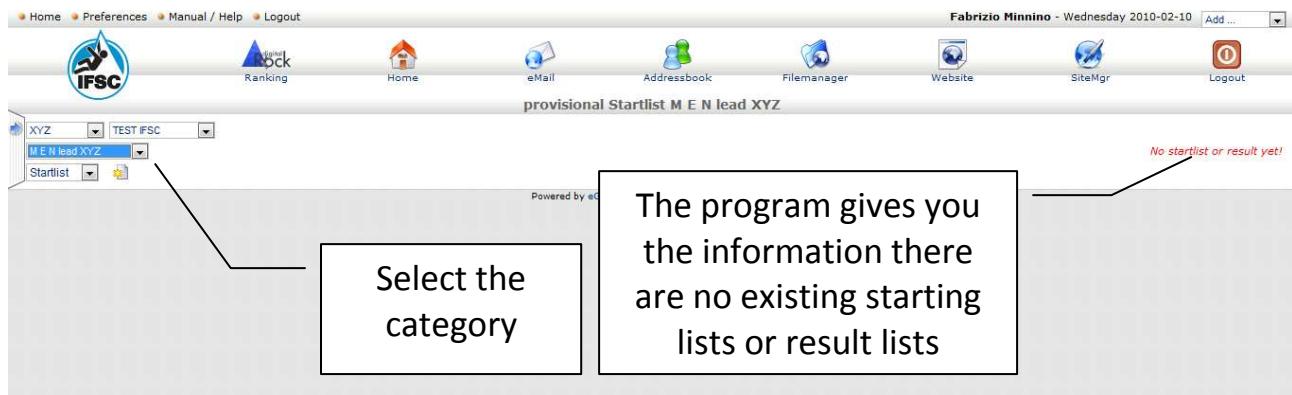

When you have finished managing Result Service you can log out using the Logout button on the main Result Service bar.

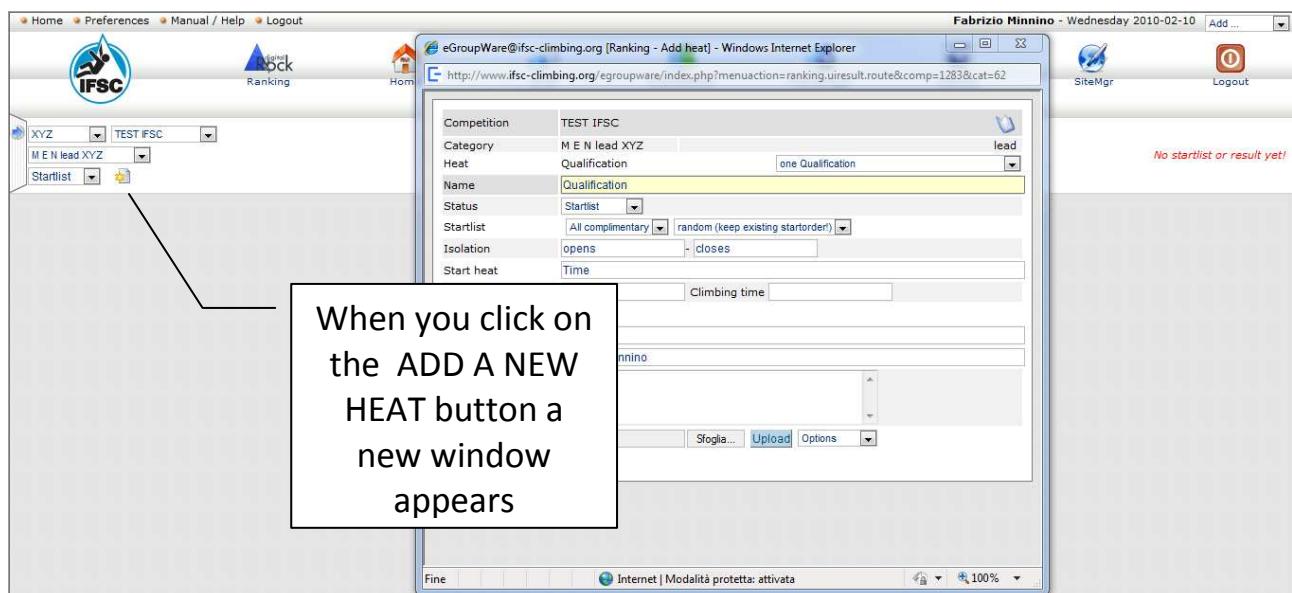

RESULT SERVICE: LEAD COMPETITIONS

Type in the Internet bar: <http://www.ifsc-climbing.org/egroupware/login.php>

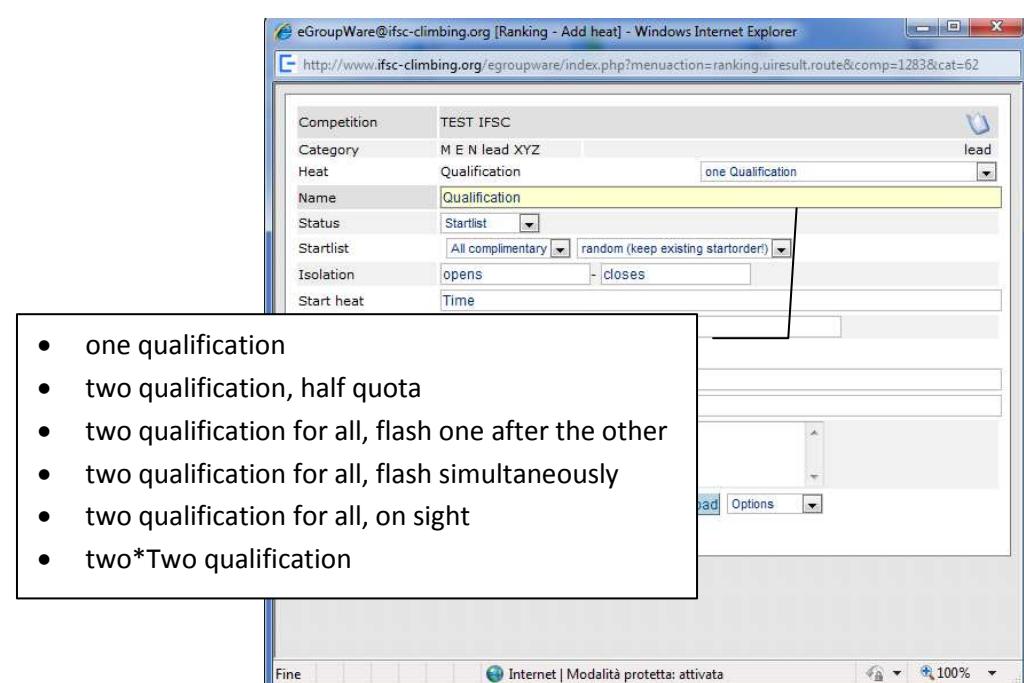

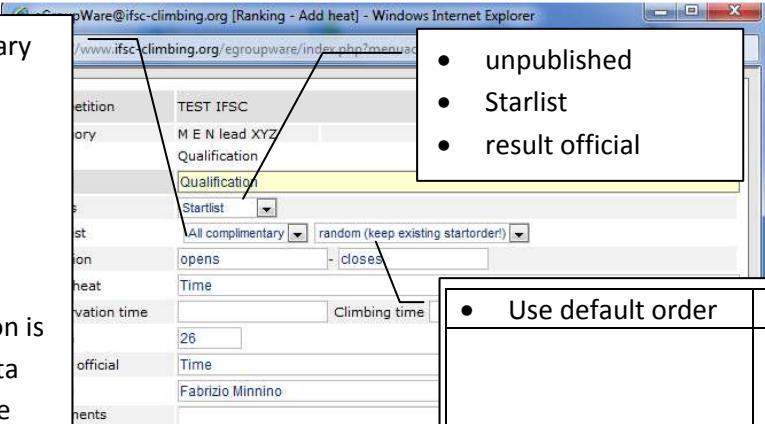

Now you have to generate the starting list for the category you have selected.

Insert in this window, according to the rule and to the official timetable, all the information the program needs to manage this heat.

<ul style="list-style-type: none"> • All complimentary • 0 • 1 • 2 • • 10 <p>For each competition is defined a fixed quota for each team: some extra quota athletes can be registered according to the rules. When you select All complimentary all the authorized extra quota is inserted into the starting list</p>	 <p>The screenshot shows a software window titled "Ranking - Add heat". In the center, there's a table with columns like "Qualification", "Starlist", and "Climbing time". A dropdown menu is open over the "Starlist" column, listing three options: "unpublished", "Starlist", and "result official". Arrows point from the list items to their corresponding menu entries.</p>
--	---

- unpublished
- Starlist
- result official

• Use default order

- Random (keep existing starting order)

It keeps the existing starting order but randomizes the new registered competitors (since the last creation of the startlist. If the startlist is created only once all competitors are randomized)

- Random (distribution ranking)

The starting order of all climbers is randomized but, if there are two or more qualification routes, the athletes are allocated in each route according to the current World Ranking

- Random (distribution cup)

The starting order of all climbers is randomized but, if there are two or more qualification routes, the athletes are allocated in each route according to the current Cup Ranking

- Ranking (unranked last)

The startlist will be created according to the ranking (the best is first) and unranked climbers will start after ranked climbers. The starting order of unranked climbers will be randomized

- Reverse ranking (unranked first)

The startlist will be created reverse to the ranking (the best is last) and unranked climbers will start before ranked

For each competition is defined a fixed quota for each team: some extra quota athletes can be registered according to the rules. When you select **All complimentary** all the authorized extra quota is inserted into the starting list

• Use default order	
• Random (keep existing starting order)	It keeps the existing starting order but randomizes the new registered competitors (since the last creation of the startlist. If the startlist is created only once all competitors are randomized)
• Random (distribution ranking)	The starting order of all climbers is randomized but, if there are two or more qualification routes, the athletes are allocated in each route according to the current World Ranking
• Random (distribution cup)	The starting order of all climbers is randomized but, if there are two or more qualification routes, the athletes are allocated in each route according to the current Cup Ranking
• Ranking (unranked last)	The startlist will be created according to the ranking (the best is first) and unranked climbers will start after ranked climbers. The starting order of unranked climbers will be randomized
• Reverse ranking (unranked first)	The startlist will be created reverse to the ranking (the best is last) and unranked climbers will start before ranked climbers. The starting order of unranked climbers will be randomized

As seen before in case of an accepted appeal it is possible to change the official results:

1. Push the EDIT THIS HEAT button
2. Change the status of this heat to UNPUBLISHED
3. Modify the appealed result
4. Change the status of this heat to RESULT OFFICIAL
5. Print it again

Now you have to create a new heat (1/8 final).

The screenshot shows a multi-window application. The main window displays a competition list for 'TEST IFSC' with various filters like 'XYZ', 'Qualification', and a table of athletes. A secondary window is open for 'Ranking - Add heat'. Inside this window, fields are filled for a new heat: Competition 'TEST IFSC', Category 'M E N speed XYZ', Heat '2. Heat', Name '1/8 - Final', Status 'Starlist', Isolation 'opens at 7.00 - closes at 9.00', Start heat 'Time', Observation time 'Climbing time', Quota '8', result official 'Time', Judge 'Fabrizio Minnino', and Comments. At the bottom, there's an 'Import file' section with 'Time measurement Host' and buttons 'Save', 'Apply', and 'Cancel'. A callout box with the text 'When you click on the ADD A NEW HEAT button a new window appears' points to the 'Save' button. To the right, another window shows a list of times with columns 'Time', '2. Time', and 'Sum'.

		42.60

Insert into this window, according to the rule and to the official timetable, all the information the program needs to manage this heat.

TAKE CARE

If an athlete is injured and he/she cannot take part to this heat don't use this button: he/she would completely disappear from the competition!

To change the starting numbers in the new heat is possible (if necessary)

Heat updated

Insert here both times and then update

The winner of the match is displayed with rank 1

Now you have to create a new heat (1/2 final).

The screenshot shows a Windows Internet Explorer window with three tabs open. The left tab displays a result list for 'TEST IFSC' in 'M E N speed XYZ' category. The middle tab is titled 'Ranking - Add heat' and contains fields for competition ('TEST IFSC'), category ('M E N speed XYZ'), heat ('4. Heat'), name ('1/2 - Final'), status ('Startlist'), isolation ('opens closes'), start heat ('Time'), observation time ('Climbing time'), quota ('2'), result official ('Fabrizio Minnino'), and judge ('Fabrizio Minnino'). A button at the bottom says 'Save' or 'Apply'. The right tab shows a list of times with columns for 'Time', '2. Time', and 'Sum'. A callout box points to the 'Add heat' button with the text: 'When you click on the ADD A NEW HEAT button a new window appears'.

The screenshot shows a Windows Internet Explorer window with two tabs open. The left tab displays a result list for 'TEST IFSC' in 'M E N speed XYZ' category. The right tab is titled 'Final M E N speed XYZ' and contains a table with columns: Rank, Lastname, Firstname, Birthyear, Sektion, Regionalzentrum, City, start-number, Time, 2. Time, and Sum. A callout box points to the table with the text: 'Insert here both times and then update'. An 'Update' button is visible at the bottom of the table.

A callout box points to the 'Status' dropdown with the text: 'Change the status from STARTLIST to RESULT OFFICIAL'. A message 'Heat updated' is visible on the right side of the screen.

Now you have to create a new heat (Small Final).

The screenshot shows a Windows Internet Explorer window with three tabs open. The main tab displays a result list for 'TEST IFSC' competition, category 'M E N speed XYZ', and heat '5. Heat'. A yellow box highlights the 'Name' field containing 'Small final'. A callout box points to the 'ADD A NEW HEAT' button at the bottom left of the dialog, with the text: 'When you click on the ADD A NEW HEAT button a new window appears'. The right tab shows a list of times with columns for Time, 2. Time, and Sum. The bottom tab shows a list of athletes with columns for Rank, Lastname, and Firstname.

The screenshot shows a Windows Internet Explorer window displaying a result list for 'final M E N speed XYZ'. A callout box points to the table with the text: 'Insert here both times and then update'. The table shows two entries: 'TEST Athlete 25' and 'TEST athlete 32'. An 'Update' button is visible at the bottom left. A red message 'Heat updated' is displayed on the right side of the screen.

The right tab shows a list of times with columns for Time, 2. Time, and Sum. The bottom tab shows a list of athletes with columns for Rank, Lastname, and Firstname.

Now you have to create a new heat (Final).

The screenshot shows a Windows Internet Explorer window with the URL <http://www.ifsc-climbing.org/egroupware/index.php?menuaction=ranking.uiroute.index&comp=1283&cat=64&route=6&msg=Heat+saved%2C+Startlist+generated>. The page displays a competition setup for 'TEST IFSC' with 'M E N speed XYZ' category and '6. Heat'. The 'Name' field is set to 'Final'. A callout box contains the text: 'When you click on the ADD A NEW HEAT button a new window appears'. In the bottom right corner, a message says 'Heat saved, Startlist generated'.

The screenshot shows a Windows Internet Explorer window with the URL http://www.ifsc-climbing.org/egroupware/etemplate/process_exec.php?menuaction=ranking.uiroute.index. The page displays a result list for 'TEST IFSC' with 'M E N speed XYZ' category. A callout box contains the text: 'Insert here both times and then update'. The result list table shows two entries:

Rank	Lastname	Firstname	Birthyear	Sektion	Regionalzentrum	City	start-number	Time	2. Time	Sum
1.	TEST	Athlete 4	1974	TEST Federation		hjkh hjkh	1 15	15.29	16.10	31.39
